

Showing off presentation-to-html-to-blog using The Fascinator

ptsefton

First post

- Showed word processor based blogging
<http://ptsefton.com/2009/11/06/first-post.htm>
- Promised to look at images and presentations next

This is the interface

The interface is divided into several sections:

- ACTIONS:** Contains buttons for "Open file", "Blog to WordPress..." (highlighted), "PDF version", and "View slide show".
- METADATA:** Displays file information:
 - Date:** Mon Nov 09 15:00:25 EST 2009
 - Description:** Showing off presentation-to-html-to-blog using The Fascinator ptsefton Last (first) post Showed wor...
 - Title:** second-post.odp
 - Format:** application/vnd.oasis.opendocument.pre
- ATTACHMENTS:** A section with a minus sign icon.
- BLOG TO WORDPRESS:** A form titled "Blog information" with fields for:
 - Blog URL:** http://ptsefton.com/wp-app.php
 - Title:** second-post.odp
 - Username:** ptsefton
 - Password:** (empty field)Buttons for "Blog" and "Close" are at the bottom.
- PREVIEW:** Shows a preview of the blog post content:
 - Page 1**

What do we need next?

- Blogging a presentation is useful, but it would be good to be able to include some background as well, maybe via a document wrapped around one or more presentations.
- We need a repository deposit button – coming soon.
- We want to be able to assemble arbitrary groups of digital items and post those.
