

If you're in Melbourne come and learn about ICE on Tuesday November 27th

Daniel de Byl and I will be running an [ICE workshop next Tuesday 27th November 2007](#). We're staying on for the rest of the Clever Collections conference. Bring your computer and we'll help you install ICE and get started.

The morning session will be highly technical – I don't think anyone has signed up to that so if you turn up you will get lots of attention. A there are still places in the arvo for a general look at ICE. [Details and free registration on the APSR website](#).
